About Us

## FOOTER

#### **Issues:**

Entire site: Contact us, Navigation side panel, & "Our specialty..." statements are not needed on every page Read more buttons are all oddly misaligned. The site is very short so the arrow option to send the viewer back to the top of the page isn't needed.

Header: "Advanced Material Installation" not needed on right side.

Address and phone number can be removed and just stay in footer.

Customers & Manufacturers: logos are clickable and either lead to larger picture of logo or 404 error.

**Governement:** Read More isn't necessary unless you have more you can add to this page.

**Mezzanines:** Doesn't have multiple options like the others in the Installation header. Options need to be added in header.

Images are missing and/or misaligned.

They all say "coming soon" - is this correct still? Pictures are clickable and lead to larger picture with no info.

Read more isn't leading me to anything

**Installation:** When you only click on "Installation" the landing page only shows you 7 options when you have several more than that.

Modular Drawer Cabinets?? This is not an option in the drop down header but an option on the installation landing page.

The Mezzanines "read more" option also works on the installation landing page but does not exist on the Mezzanine landing page.

Facebook/twitter/linkedin: Do you still use these as a means to talk to potential customers? On Faceboook your last post is from 2016 and you only have 5 reviews. Twitter was last used in 2015.

Home: "Learn more" shoul maybe not in the center of image with "learn more" loc There should be something nothing is updated then Wh their values - keep that on the home page with a learn more section

Footer: Why is this the same as header? Not needed. Social icons are too small Address and email look like one long sentence but this is where they should live unless you want to make an actual "contact us" page

#### Issues/Ideas

d be consistent in every image,
the image. Warehouse store
oks good.
special/new service here. Or if
nat 3 words describe AMI and
the home name with a learn

#### Ideas to consider:

Safes?

**Our Process?** 

**Our Team?** 

Specialties/extra side services?

Mission/capabilities statement/ why choose AMI as a partner?

**Newsletter?** 

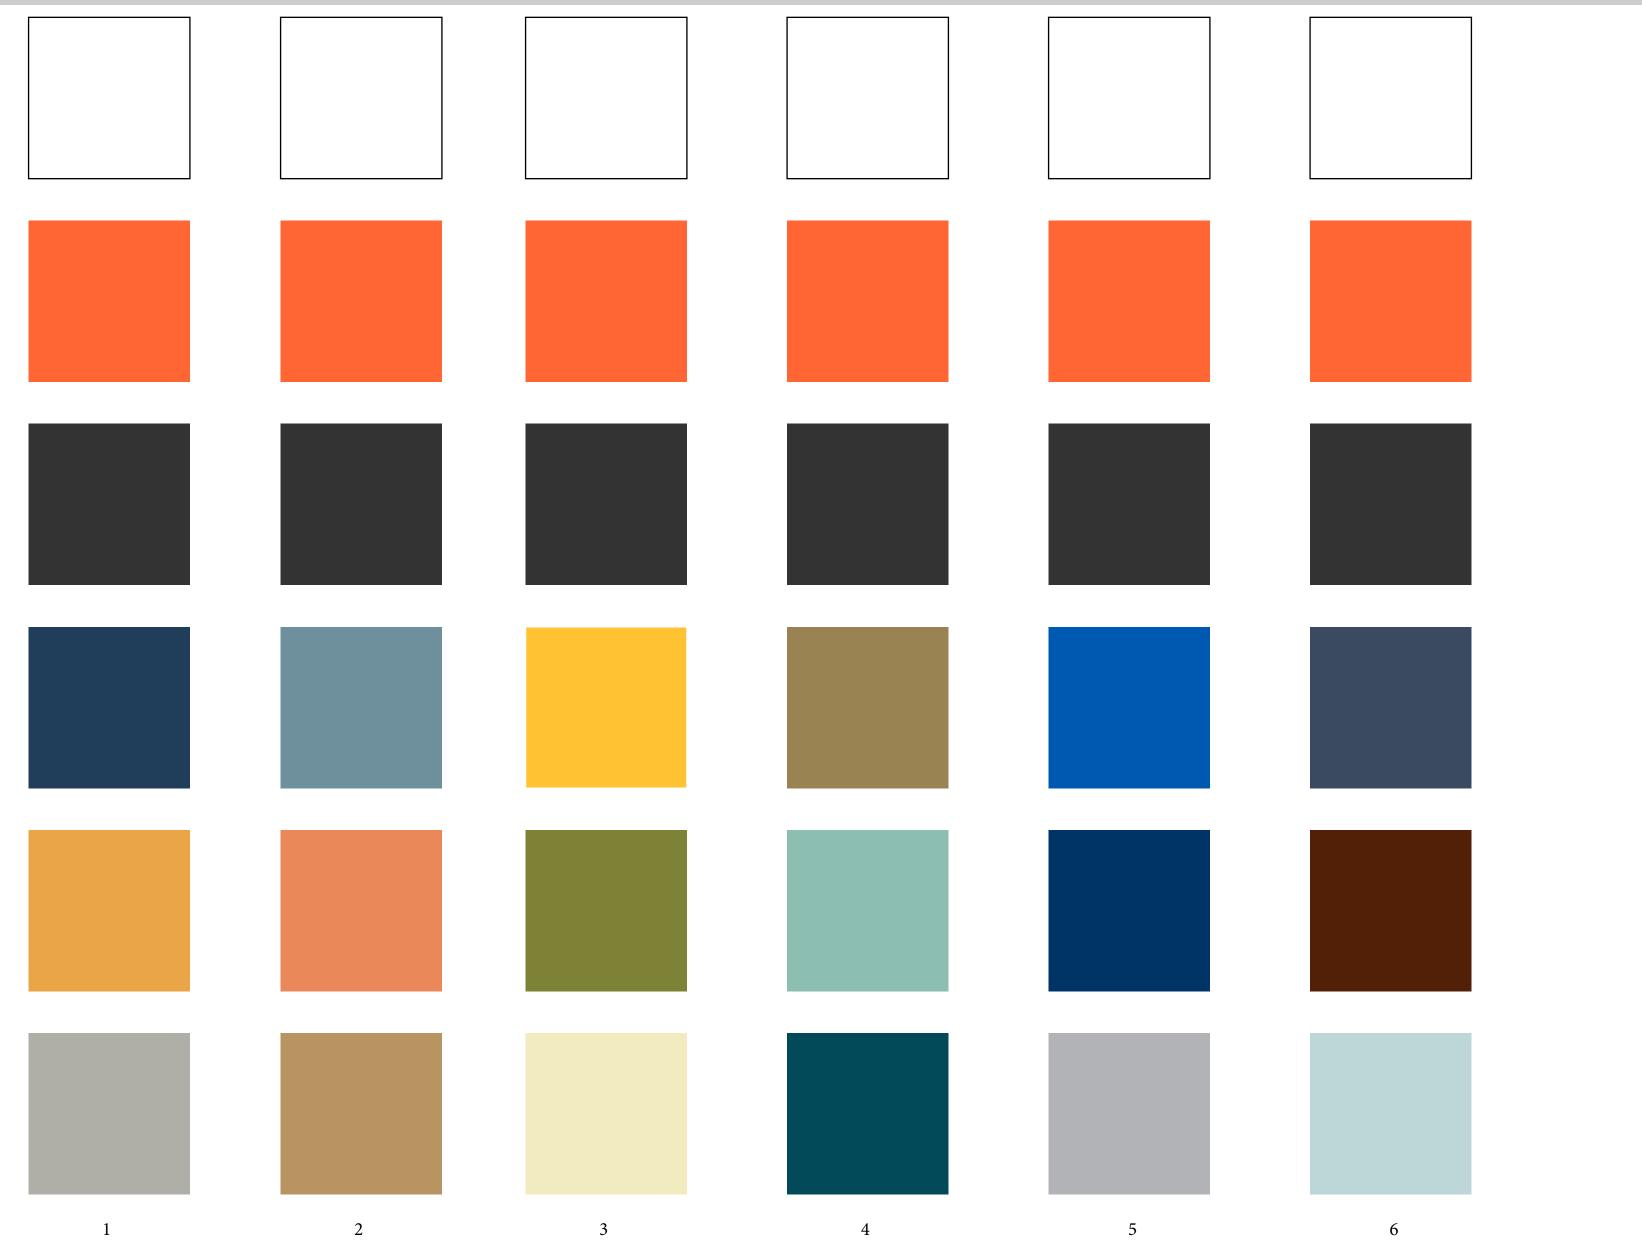

Request a proposal/estimate?

**Careers?** 

**Terminology/Education?** 

#### **Color Schemes**

## CHRISTA MORRONE

# Co-Contracting

Our specialty is finding the right material solution and installing it for you. We have an experienced and expert staff of employees who do the job right. AMI is not just a distributor or dealer of product, we are a company that provides a turn-key solution. Our employees have performed installation jobs from New York City to Las Vegas, Nevada. We've completed jobs in some of the most stringent environments including nuclear submarine bases, hospitals, and even Marine One's hanger bay. We look forward to working with you.

AMI is an experienced supplier of a wide range of industrial products. Below are a few manufacturers we currently work with.

We have partnered with some of the industry's finest range of industrial products, adding the highest quality and durability to each and every outcome.

\*\*\*NOTES\*\*\*\*\*: The lines are just my grid, will not be displayed on actual site.

pictures, colors, and fonts can be changed. Nothing set yet.

Black lines signify text or name

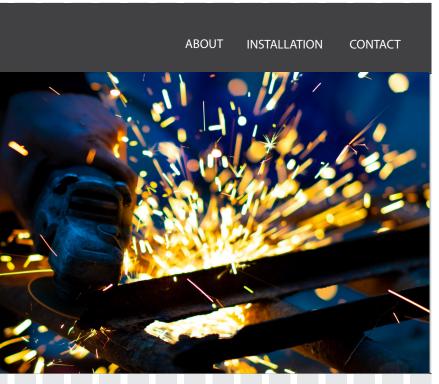

Having logos grayed out like above may look nicer in my opinion rather than so many colors on one page, when you hover over logo it would either change to black or color logo.
